Damien BIREMBAUT

Software Engineer | Frontend Developer
Lille Area, France | (+33) 06 20 37 00 03 | damien.birembaut@epitech.eu
github.com/Raptorrr | linkedin.com/in/damienbirembaut
Mobility: Willing to Relocate Internationally (Strong Preference: Japan)

~/ PROFILE SUMMARY

Proactive Software Engineer completing an Expert Diploma at Epitech, specializing in fullstack and frontend development (`React`, `TypeScript`, `Node.js`). Proven track record of building responsive, scalable applications and thriving in cross-functional, multicultural environments. Having successfully completed a Master's degree in China, I demonstrate high adaptability and a strong global mindset. Eager to bring my technical expertise to an international team, with a strong ambition to relocate and build a long-term career in Japan.

~/ PROFESSIONAL EXPERIENCE

EPITECH — Lille, France Teaching Assistant (Sep 2025 – Present)

- Mentored software engineering students, providing technical guidance, code reviews, and support across various programming paradigms.
- Fostered a collaborative learning environment, troubleshooting complex coding issues and ensuring academic success.

Reconomia — Lesquin, France Frontend Developer Intern (Feb 2024 – Jun 2024)

- Designed and implemented interactive frontend features for a web application using `React` and `TypeScript`.
- Collaborated closely with cross-functional teams to optimize user experience, responsive design, and performance.

Toboro — Paris, France (Remote) Frontend Developer Intern (Sep 2023 – Jan 2024)

- Developed a modern web application from scratch using `React` and `TypeScript` within an `Nx monorepo` architecture.
- Ensured scalable, maintainable code structures and seamless integration of complex frontend components.

Leclerc — Saint-Amand-Les-Eaux, France Drive Employee (Jul 2023 – Aug 2023)

- Managed order fulfillment and inventory restocking efficiently in a fast-paced environment.

Crèche à la Demande — Lille, France Fullstack Developer Intern (Jul 2022 – Dec 2022)

- Contributed to the comprehensive redesign of a web platform that streamlines finding and booking daycare centers in France.
- Collaborated on both frontend and backend tasks to deliver robust functionality and improved user workflows.

~/ TECHNICAL SKILLS & LANGUAGES

- **Programming:** `C/C++`, `Python`, `Rust`, `Java`, `Golang`
- **Web Technologies:** `React.js`, `React Native`, `TypeScript`, `Node.js`, `HTML/CSS/SASS`, `PHP`
- **Tools:** `Git`, `Docker`
- **Soft Skills:** Adaptability, Cross-cultural Communication, Project Management, Autonomy
- **Languages:** French (Native), English (Fluent / C2), Chinese (HSK3), Japanese (Beginner - Actively Learning)

~/ EDUCATION

EPITECH — Lille, France Expert Diploma in Software Engineering (Sep 2021 – Jun 2026)

- Comprehensive five-year program emphasizing project-based learning, software architecture, and practical application.

Beijing Jiaotong University — Beijing, China Master's Degree in Software Engineering (Sep 2024 – Jun 2025)

- Year abroad program enriching the academic curriculum with international perspectives and advanced software methodologies.

~/ KEY PROJECTS

Lumia — Project Manager & Lead Frontend Developer (Jun 2024 – Feb 2026)

- Led a team to conceptualize and build an interactive learning platform (similar to CodinGame) focused on teaching users how to develop their own Artificial Intelligence models across diverse learning levels.
- Managed project timelines, coordinated development tasks, and engineered a seamless user interface for the End of Study project.

EpiRoom Lille — Fullstack Developer

- Developed a room planning and booking management system for Epitech Lille using a `Go (Gin)` backend and a `Next.js` frontend.
- Integrated intranet scraping via `Go-Rod` and containerized the architecture with `Docker` and `Traefik`.

Kaze — Distributed Systems Engineer (Ongoing)

- Architecting a high-concurrency distributed task orchestrator in `Go` with a `PostgreSQL` state layer.
- Implementing gRPC-based worker pools, secure mTLS communication, and scalable task scheduling.

Soku — Rust & WebAssembly Engineer (Ongoing)

- Building a high-performance, real-time collaborative vector drawing engine using `Rust` compiled to `WebAssembly`.
- Designing canvas rendering systems with shared memory buffers and real-time synchronization via WebSockets.

Shin — AI & Fullstack Engineer (Ongoing)

- Creating an AI-powered document intelligence platform utilizing `FastAPI`, `LangChain`, and `React`.
- Developing RAG pipelines and a dynamic force-directed knowledge graph (`D3.js`) to visually navigate document relationships.
